

AI FOR SMARTER SEARCHING

From a text IPscreeener explores the **world-wide patents**. Instant smart insights to the innovation landscape. With **trends**, relevant **documents** and AI assisted **reading**. Collaborate and report findings on-the-fly.

BE AN AI ENHANCED SEARCHER

The **IPscreeener AI** searches an input text in iterative steps to deliver results with high **accuracy** and **precision**. This includes learning from user behavior, pointing out relevant **text paragraphs** and **highlighting key terms**. You may at any time take control and **focus strategy** with classes, dates etc.

INTEGRATED INNOVATION PROCESS

Use IPscreeener either as a **WEB tool** or as integrated **via APIs** to your existing innovation platform. Your cases will be presented with a **prior art screening** automatically. Of course, it is possible to get **customized reports**. Automatically generated from users' **actions** and **comments**.

MEASURED SEARCH PERFORMANCE

We are **100% transparent** about the quality IPscreeener deliver. You will always get analytics and **performance scores** for your technical domain. If interested, we may even deliver an analysis of **your company** patent portfolio, a **specific** technical domain or for a set of **competitors** or **clients**
